

MANIFESTO FOR A NEW WORLD

IT'S TIME TO ACT, JOIN US!

Who we are and our ambition!

We are the Willka Hampi collective .

We have been established in Peru, in the Sacred Valley near Pisac - Cusco for 25 years.

We are a community, a center of traditional medicine and of formation for project leaders.

We have 4 lands between Pisac and Machu Picchu area. With self-sufficiency projects.

Our collective is composed of 10 active permanent members.

We have a lot of experience and our ambition is to impulse the project of a new society.

We wrote this card in April 2020, and we share it again today, 6 years later, as it seems to us more and more relevant in the present.

OPEN YOUR EYES... AND ACT NOW!

A WORLD IS DYING, TO MAKE WAY FOR A NEW ONE.

What is the current state of the world?

It is easy to notice that the world situation is deteriorating very rapidly, in different aspects, and that the consequences for the future can be devastating. That's why it has never been so necessary and urgent to think about our personal and collective future.

If we recognise that the current society is intrinsically unsustainable, we can start to see this alarming situation as an opportunity to make the positive changes that Mother Earth has asked of us, inside us and in the world.

We have no interest in fighting to save that which will inevitably collapse, but rather to concentrate our attention on building the future.

For us, this begins by defining a practical strategy and the means to make appear something new together.

We do not want to wait for society to collapse to start a new story. In our opinion, it's about acting now!

LEARN FROM THE PAST... AND GO FORWARD, TOGETHER!

OBSERVE AND FOLLOW THE GUIDANCE OF NATURE

What have we learnt from our recent past?

Major epidemics are not new in the history of humanity and will continue to appear. If we consider them as a means that nature has in order to maintain balance, it's conceivable that in the future they can manifest at a greater magnitude, if we do not take this warning seriously and if we do not try to realign ourselves with the path of life, its meaning and finality.

There is always an internal cause for what manifests in the external reality. So, we understand that a new beginning demands us not only a change on the manifested plane, but also a change of consciousness.

All this means that while working on the concrete plan, in parallel we have to revise the internal structural and philosophical vision that we have of life; which will permit us to reexamine the mechanisms of our subconscious functioning.

The speed of propagation of viruses is linked with the population density. So, big cities are more vulnerable to propagation of disease. They also favour individualistic consciousness which is one of the deep root causes of our separation with Mother Nature. This creates a sick collective subconscious, which is the perfect ground for the virus to develop.

IN THE FACE OF CHAOS, WHAT SOLUTIONS ?

CIRCLE CONSCIOUSNESS AND COMMUNITY LIFE

What conditions will allows us to overcome these difficulties and live harmoniously ?

Nature offers us the antidote: circle consciousness.

That means “the unity of life in the complementarity of its diversities”; the relation between the inclusive and the included, and among them in the complementarity of their differences.

This philosophical base permits us to get out of egocentrism, coming back to the notion that the individual is at service to the collective, without negating their own identity, melting or dissolving into the group, but rather realising their being through it. For example: an organ cannot function separately from the other organs, but rather in complementarity; all being at service to the inclusive identity that includes them: the body.

For these reasons, we see the necessity to reunite as a collective (communities, clans, family networks, etc.) in a self-sufficiency project in a rural environment, as the means to awaken up this consciousness.

Circle consciousness only can appear through a new web of exchange between autonomous cell: which represents an original and natural way of life.

COMMUNITY LIFE... THAT IS MODERNITY!

CITIZEN MOVEMENT AND SELF-SUFFICIENCY

Why and how to activate it?

Our immune systems are deteriorating due to our artificial way of life. Hence the need to restore ourselves in a healthy environment and produce food not contaminated by industrial agriculture techniques. This does not mean returning to the stone age, but rather developing alternative technologies based on the vision that we are part of nature and not above it to exploit it.

The idea is to establish communities in the form of cooperative networks, non-industrial food farms and clan enterprises; doing business at the local level to ensure that our vital necessities are covered. What will allow us to get out of a system that goes against all our interests and which, in all cases, is in a painful process of dying. Is it not time to jump the sinking ship?

In order to reestablish a rural environment in the form of small self-sufficient communities, it would be favorable to make appear a citizen movement to reclaim the right to live on small agricultural terrains in alternative housing, so with reduced investment costs. This would also permit to maintain or restore the fertility of the agricultural lands that have been mistreated, in order to revive the ecosystem.

TAKE ACTION NOW: ORGANISE, COMMUNICATE, MEET!

LIVE THE PRESENT WITHOUT FURTHER ADO, TO PREPARE A BETTER FUTURE

Concretely, what to do?

In view of the fall of the economic system being close, it would be good to start reuniting our potential resources (economic and otherwise) in order to launch such projects.

We invite those people who can share the vision of this possible future and the urgency to redefine their plan of life, to consider meeting on the base of personal affinities, so as to make appear rural, social cells with self-sufficiency projects. This, in your part of the world and with the people that correspond to you.

On our part, we propose solutions to live in community here in Peru, with possibilities for expansion.

We can start by communicating, by email or WhatsApp. In English, Spanish or French.

You can visit us and join the community. We offer different options for your stay.
